

## Georgia Armature Boxing Association Comes Back To Atlanta

The Premier Image doctors and staff strive to stay involved in community projects even in the area of sports. That's why recently; you could spot Dr. DeJoseph and Dr. Silver, ringside at the Georgia Armature Boxing Association venue held in Gainesville, GA. Their voluntary role was to oversee and provide medical assistance for the boxers should the need arise.

Dr. Silver has maintained a life long love for boxing which was a passion passed on from his father who was a star professional boxer in the '20's. For years Dr. Silver has donated time to the Georgia Armature Boxing Association by performing physical exams on boxers and sitting ring side as the attending physician. This interest spurred the Atlanta Olympic Committee to tap him for the sight coordinator during the Olympics in Atlanta boxing venue.

Recently, in an attempt to bring back boxing to Atlanta, he was asked to help out with the boxing venue held in Gainesville. All of the boxers along with the promoters and the Georgia Boxing commissioner gathered at the office of Premier Image for their pre-fight physicals and weigh in.

Premier's doctors, nursing director, Vicki O'Conner, administrator, Jeanette Hames, and other staff members all assisted in helping to get the boxing match underway by insuring safety for all the boxers.
