The QT Mini Facelift

The "[QT Mini Facelift](#)" was recently featured on Fox 5 & 11 Alive News as the best low down time alternative to the traditional full facelift because only local anesthesia and minimal downtime is needed.

A new low-downtime facelift, the "QT Lift" developed by [Dr. William E. Silver](#) and [Dr. Louis DeJoseph](#) for people not quite ready for a full facelift or those who just can't afford much time away from their busy lives, but desire a fresh,

February is here and love is in the air. For us, it's about building quality relationships and building up trust. We're committed to helping you love your life more. Look for our many Valentine's Day Specials to help you heat up the moment!

We have many new services, products and advancements in surgical and non-surgical procedures to help you stay looking beautiful for life.

I want to invite you and your friends to our upcoming seminar on February 21st. It's a fun filled evening with plenty to eat and drink, lots of door prizes and best of all, three wonderful and talented, Board Certified Plastic Surgeons to share the evening with, as they deliver an informative, visual presentation on plastic surgery today.

Happy Valentine's Day,

Jeanette Hames

Gift Certificates from Premier Image are the Perfect Expression of Love!

ArteFill, the First to Last

Discover the first and only non-resorbable injectable wrinkle filler.

ArteFill is different than other dermal fillers. Where the results of temporary fillers end, the enduring benefits of ArteFill continue.

rejuvenated appearance.

"The "QT Mini-Facelift" offers all the benefits of a traditional full facelift by correcting sagging facial skin, neck and jowls. This includes tightening of the SMAS (underlying muscle layer) for added lift, contour and longevity, but with minimal down-time," reported Dr. Silver.

Benefits of the "QT Lift":

Low Downtime
Procedure

Less Swelling & Bruising

Affordable

Quick Recover Time

Local Anesthesia

"The Truths & Myths of Plastic Surgery"

Please be our guest,
**Thursday, Feb 21st at
6pm** for an evening filled
with Fun, Food, & Wine

Double & Triple Board
Certified Plastic Surgeons
share with you a delightful
meal and an informative,
visual presentation on
surgical and non-surgical
facial and body cosmetic
procedures.

If you have previously used temporary dermal fillers such as Restylane, Juvaderm, Radiesse and Sculptra, then you know they are eventually absorbed by the body and require frequent repeat injections to maintain correction.

With ArteFill, you can now get the lasting wrinkle correction you want in just one or two treatments.

The unique microspheres in ArteFill are not absorbed by the body and provide the permanent support your skin needs for long-lasting wrinkle correction.

Benefits of ArteFill:

Immediate, visible results with no downtime

A simple in-office procedure

Results improve over the course of several months
and are permanent

Is ArteFill safe? Yes, the FDA approved ArteFill for the safe and effective correction of smile lines.

In addition, doctors DeJoseph and Silver require patients to have a skin test as a safety precaution to ensure you are not allergic to the bovine collagen or anesthetic in ArteFill.

A consultation is needed as not everyone is a candidate for ArteFill.

Wouldn't it be nice to go braless under today's tank tops and strappy dresses again, then you might consider a breast lift. A [breastlift](#) is a procedure that returns sagging breasts (breast ptosis) to their perky, more youthful position. The breast tend to elongate and lose their youthful contour with aging, loss of skin elasticity and gravity or are a result from pregnancy, breastfeeding, weight changes, or hereditary factors.

Mastopexy is a surgical procedure that lifts and firms the breasts by removing excess skin then lifting and tightening the underlying breast tissue to reshape and improve breast contour and firmness. Sutures are layered deep within the breast tissue to provide support for the new breast shape.

[Dr. Marc Klein](#) of Premier Image is able to offer patients more options in size and shape of the breasts with his years of experience specializing in breastlift surgery. Klein's more advanced techniques have resulted in smaller external incisions, improved breast shape and greater patient satisfaction.

With Klein's "**Minimal Incision Mastopexy**", also called "Short Scar technique", most of the sutures are placed beneath the skin and are absorbed by body; any external incision is camouflaged in the natural breast contours.

Are you a candidate for Breast Lift Surgery?

Breasts are pendulous, with adequate breast tissue

Nipples and areolas point downward

Dr. Klein's approach is to individualize treatment to your specific circumstances and goals and to help you achieve the appearance you desire with the least invasive procedure available, thus creating a mutually rewarding experience.

Breast Lifts do not reduce or increase the mass of the breast. If this is your goal, you may choose either a [Breast Reduction](#) or [Breast Augmentation](#).

The final results of your breast lift will appear over the next few months as breast shape and position continue to settle.. The small incision lines will continue to fade over time.

Results should be long lasting, although breast shape is affected by weight gain, pregnancy and they continue to change with aging and gravity. Maintaining

Remember that picture I promised you? Yes, the one with Dr. Louis DeJoseph cart racing!! He's just so cute!

good health and stable weight will help you retain your new look longer.

Call 770-457-6303 to schedule your consultation with Dr. Klein today.

Tame Your Hunger

Have you tried diets, diet pills, exercise programs and nothing seems to work. Then you may be a candidate for the new **LAP-BAND System** procedure a device proven to help you lose weight.

Dr. Paul Macik can help you tame your hunger with the new **LAP-BAND® System, an adjustable gastric band designed to help you lose excess body weight**, improve weight-related health conditions and enhance quality of life.

Unlike gastric bypass, the **LAP-BAND® System** is a minimally invasive procedure that is adjustable, completely reversible and does not require stomach cutting and stapling or gastrointestinal re-routing.

During the procedure, Dr. Macik makes tiny incisions (**laparoscopic approach**) to secure the **LAP-BAND** around the upper stomach to limit and control the amount of food you eat. Much like a wristwatch, **the LAP-BAND is adjustable.**

"Since there is no stomach cutting, stapling, or gastrointestinal re-routing, it is considered the safest and least invasive of all weight-loss surgeries," continued Dr. Macik. "The laparoscopic approach to the surgery also has the advantages of a quicker recovery.."

"The band itself is just a silicone ring filled with saline," says Macik. "During an office visit, **I can adjust the rate of weight loss by simply adding or removing saline from the ring** through an access port."

The **LAP-Band can be modified to meet your individual needs**, which can change as you lose weight. For example, pregnant patients can expand their band to accommodate a growing fetus, while patients who aren't experiencing significant weight loss

can have their bands tightened.

Weight loss isn't a "**magic pill**" that works by itself, it requires commitment to changing your lifestyle to focus on healthy eating and exercise. I want to help you reach your goal weight and then maintain it.

Dr. Paul Macik, board certified general surgeon on staff at Northside Hospital has performed well over 1200 bariatric procedures since 1991. To schedule a consultation, please call 404-252-2220.

Re-New Skin's Surface with the "ArticPeel" Laser Treatment

The minimally invasive "**ArticPeel**" procedure is becoming the standard in skin rejuvenation treatment.

The "ArticPeel" improves uneven skin texture, sun damage, and fine wrinkles, and has a low-risk profile with minimal recover time. Best of all, your skin will have a more radiant and youthful appearance.

The "ArticPeel" uses laser energy to ablate 10 to 30 microns of epidermis, vaporizing the most damaged tissue. Beneath, 20 to 60 microns of tissue are coagulated by the laser energy providing full epidermal turnover.

Once the tissue is thermally coagulated, a natural protective dressing forms on the skin. This effect makes the healing comfortable and safe during the restorative process. On day 3 or 4, the natural dressing peels or sloughs off, leaving new, healthier and vibrant skin.

Residual heat in the upper dermis stimulates new collagen production. Over time, this results in improved skin elasticity and a fuller, smoother appearance. The "ArticPeel" achieves all this in a 15-20 minute treatment with little or no downtime. The result is beautiful skin.

Patients are delighted as they notice an improvement very quickly after only one treatment, whereas many other combination treatments may take weeks to see a benefit.

Are you finally ready to look great and take years off your appearance? Call 770-457-6303 for a Complimentary Consultation.

Chemical Peels, Masks & Microdermabrasion

Chemical peels, masks and microdermabrasion deliver immediate results for tighter, glowing, more beautiful skin.

Unlike spa treatments, these are medical-grade treatments administered by certified medical aestheticians under the direct supervision of board certified plastic surgeons.

If you're serious about skin care, then you're probably already aware of the benefits of these anti-aging treatments. The collagen-building treatments are powerful and immediately begin to work.

Combined with appropriately selected pharmaceutical-grade skin care products you'll discover amazing results in how youthful your skin will appear!

These anti-aging crèmes and powerful treatments instantly replenish, hydrate, and luminate the skin.

Within days, new collagen forms beneath the skin's surface and within weeks, you actually see and feel the difference.

These medical grade facials infuse the skin with the immense benefits of many different active ingredients: peptides, growth factors, vitamin C, hyaluronic acid, antioxidants and AHAs. These vital ingredients help restore the skin's suppleness, vitality, moisture and radiance while providing relief to even the most damaged skin.

Book your facial today and see the results. Call, 770-457-6303.

Premier Image Cosmetic & Laser Surgery, Georgia's first multi-specialty cosmetic surgery practice founded by Triple-Board Certified Facial Plastic & Reconstructive Surgeon, Dr. William E. Silver in answer to his dream of bringing you a luxurious and comfortable center where all your cosmetic facial & body plastic procedures can be met by board certified surgeons in their specialty fields.
